

16-Piece Hole Saw Kit for Wood and Plastics

This comprehensive kit is designed for cutting holes in wood or plastics. It includes 12 black oxide high carbon steel hole saws, two arbors, a pilot drill, a hex key, and a reinforcing plate, all within a robust storage case.

Product Overview

Professional Hole Saw Kit

This comprehensive 16-piece hole saw kit is engineered for precision cutting in wood and plastics. Constructed from high-grade, black oxide high carbon steel with induction-hardened teeth, these blades are designed for extended drilling life and durability. The set includes a versatile range of popular sizes and essential accessories, all organized within a robust blow-moulded storage case for easy transport and protection.
