

16-Port Gigabit Web Smart Ethernet Switch

This 16-port 10/100/1000 web smart Ethernet switch provides high-speed network connectivity. It features web-based management, VLAN support, QoS, and link aggregation for enhanced performance and network control.

Product Overview

High-Performance Connectivity

This 16-port Gigabit Web Smart Ethernet Switch is engineered to provide robust network connectivity for small to medium-sized business environments. It features high-speed 10/100/1000 Mbps throughput across all ports to ensure efficient data transfer. With advanced capabilities like web-based management, VLAN support, and Quality of Service (QoS), it offers professional-grade control and performance optimization for critical network infrastructure.

Technical Specifications

Total Ports	16
Data Transfer Speed	10 Mbps, 100 Mbps, 1000 Mbps
Model Identifier	E2S216

Features

Management Capabilities

- Web-based management interface
- VLAN support
- Quality of Service (QoS)
- Link aggregation
