Product Overview

Centralized System Management

The KVMS-P16 is a professional-grade 16-port KVM switch designed to streamline the management of multiple computers or servers from a single console. By consolidating keyboard, monitor, and mouse control, this device significantly reduces workspace clutter and enhances operational efficiency in data centers and server rooms. It supports high-resolution video and offers intuitive switching features, making it an essential tool for IT administrators requiring reliable, centralized system access.
