

16-Slot 2U Cable Management Rail

This 16-slot, 2U cable management rail is designed for organizing and routing cables in network racks and server cabinets. It ensures a clean and efficient cable layout, preventing tangling and improving airflow.

Product Overview

Professional Cable Organization

This 16-slot 2U cable management rail is designed to optimize network rack and server cabinet installations. It ensures that cables enter distribution frames smoothly and in parallel, significantly improving the aesthetic and organization of internal wiring. By promoting a clean layout, this solution helps prevent cable tangling and enhances overall cabinet airflow efficiency.

Technical Specifications

Rack Height	2 U
Capacity	16 slots
Model ID	PS-16024
Construction	Metal

Compliance and Quality

Quality Warranty	25 years
Certifications	CNAS, CNAS L1066
