Overview

Heavy-Duty Material Handling Solution

This 16-ton heavy-duty forklift is engineered for demanding industrial environments, including ports, construction sites, and large-scale warehouses. It features a robust design with a 3.5-meter lifting height and an extended 1800mm fork for versatile load management. Equipped with advanced hydraulic systems and an ergonomic, climate-controlled cabin, it ensures both operational efficiency and operator comfort during extended shifts.

Performance Metrics

Lifting Capacity

16 Ton

Capacity

3.5 m

Lifting Height

1800 mm

Fork Length

Key Features

Core Components

- Original hydraulic valve and pump
- High-strength mast construction
