## Overview

### High-Performance 1600W Circular Saw

This 1600W circular saw is designed for precision and durability in demanding cutting applications. Featuring a robust 185mm blade and a no-load speed of 5000rpm, it delivers clean, efficient cuts across various materials. With a net weight of 4.5kg, this tool balances power with maneuverability, making it an essential addition to any professional workshop.
