Overview

Reliable Circuit Control

The 3SGL-160/3 is a robust load break switch engineered for safe and reliable electrical circuit interruption. Designed to handle a rated current of 160A at 400V, it provides essential control for various electrical applications. This unit features a durable manual handle and clear ON/OFF position indicators to ensure operational safety and ease of use in professional environments.

Technical Specifications

Rated Current

160 A

Rated Current

Rated Voltage 400 V

Frequency 50 Hz

Number of Poles 3

Compliance & Standards

Compliance Standards IEC60947-3, CE

Features

Key Features

- Manual operation via durable handle
- Clear ON/OFF status indication
- Robust construction for circuit interruption
