

160A Portable Arc Welding Machine

Compact and portable, this 160A arc welding machine is designed for small-scale welding applications. It features adjustable current control, overload protection, and dual voltage input (180V/220V).

Product Overview

Professional Portable Arc Welder

This 160A portable arc welding machine is engineered for versatility and reliability in small-scale welding operations. Designed with a focus on convenience, the unit features adjustable current controls and robust overload protection to ensure consistent performance. With its dual voltage compatibility, it is a highly adaptable tool suitable for a wide variety of maintenance and repair welding tasks.

Technical Specifications

Integrated Safety Systems

- Overload protection
- Adjustable current control

Supported Input Voltage	180V, 220V
Form Factor	Portable Compact Arc Welder
