Overview

High-Performance Earthmoving Solution

The 160hp Standard Dryland Bulldozer is engineered for robust performance in construction and agricultural earthmoving. Featuring a powerful engine and a durable, high-impact main frame, this machine is designed to handle demanding site preparation, grading, and land clearing tasks. Its integrated hydraulic system and advanced planetary transmission ensure high operational efficiency and precise control for the operator.

Performance Metrics

Rated Power

131 KW
Engine Power

178 HP
Horsepower

Technical Specifications

Operating Weight	18.4 ton
Engine Model	Weichai WD10G178E25
Rated Engine Speed	1850 rpm

Hydraulic System

System Pressure	14 Mpa
-----------------	--------

Transmission

Gearbox Configuration

- Planetary gear structure
- Multi-plate clutch
- Forced lubrication system
- 3 forward gears
- 3 reverse gears

Construction Quality

Chassis Build

Full box structure, Steel plate welded, Integrated rear axle box, High impact load capacity, Anti-twist design
