Overview

High-Performance Swamp Crawler Bulldozer

This 160hp swamp crawler bulldozer is engineered for superior performance in challenging, soft, and uneven terrains. Featuring a robust full-box main frame and an advanced planetary gear transmission, it offers high impact resistance and reliable power delivery. The machine is designed to maximize productivity in construction, land reclamation, and infrastructure projects by combining excellent traction with a heavy-duty hydraulic system.

Performance

Rated Power

131 kW

Rated Power

178 HP

Rated Power

Engine Model

Weichai WD10G178E25

Rated Speed

1850 rpm

Specifications

Operating Weight

18.4 ton

Transmission System

Planetary Gear, Multi-plate Clutch, Forced Lubrication

Gearbox Shifts

3 Forward and 3 Reverse

Hydraulic System

Hydraulic Safety

- Overload protection function
- Reduced failure rate components

Working Hydraulic Pressure

14 Mpa

Design

Main Frame Structure

Steel plate welded full box type integral structure
