Overview

Industrial Precision Cutting

The 1610 Laser Cutting Machine is a versatile, high-performance tool engineered for industrial and commercial applications. Featuring a spacious 1600mm x 1000mm work area, it excels at processing large-format projects with high accuracy and efficiency. Its robust construction, combined with advanced laser technology and user-friendly controls, makes it an ideal solution for woodworking, signage, manufacturing, and crafts.

Technical Specifications

Working Area

1600 mm
Width

1000 mm
Depth

Key Features

- Robust frame construction
- Integrated cooling system
- Integrated exhaust system
- User-friendly control panel
- Emergency stop safety mechanism
- Enclosed laser housing

Compatible Materials

Wood, Acrylic, Fabric

Applications

Ideal Industries

Advertising • Woodworking • Manufacturing • Signage • Crafts
