

165KVA MFDC Bracket Welder

The 165KVA MFDC bracket welder is engineered for precise welding applications. Its advanced control system ensures accurate energy delivery, which minimizes heat-affected zones and reduces material distortion.

Product Overview

Precision Bracket Welding Solution

The 165KVA MFDC (Medium Frequency Direct Current) Welder is engineered specifically for precision bracket welding applications, particularly within the compressor industry. This robust system ensures high-quality, consistent welds through an advanced control system that minimizes material distortion and heat-affected zones. Its compact, efficient design allows for seamless integration into existing production lines while prioritizing operator safety and performance.

Technical Specifications

Rated Capacity

165 KVA

Rated Capacity

Electrical Performance

Parameter	Value
Max. Primary Current	120 A
Max. Short Circuit Current	30 KA

Power Supply 380V / 3/ / 50Hz

Max. Working Pressure 10 KN

Dimensions

Dimensions (LxWxH) 1026 x 1652 x 2831 mm
