

# 16.8V 20A Lithium Iron Phosphate Battery Charger

This battery charger is designed for 16.8V 4S lithium iron phosphate (LiFePO4) battery packs. It delivers a charging current of 20A at 12V for rapid and efficient charging.

## ADDITIONAL IMAGES

## Overview

### High-Performance Battery Charger

This versatile 300W battery charger is engineered for efficiency and reliability, supporting a wide range of battery chemistries including Li-ion, LiFePO4, and lead-acid. Housed in a durable aluminium alloy casing, it is designed for rapid charging applications such as electric motorcycles, scooters, and e-bikes. With universal socket compatibility and robust build quality, it provides a dependable power solution for professional and recreational use.

## Technical Specifications

### Output Voltage & Current

**16.8 V**  
Voltage

**20 A**  
Current

Output Power	300 W
Input Voltage Range	110-132VAC / 200-264VAC
Supported Battery Types	Li-ion, LiFePO4, Lead Acid

## Physical Characteristics

Dimensions	135 x 90 x 50 mm
Net Weight	0.9 kg
Casing Material	Aluminium Alloy

## Compliance & Support

### Certifications

CE • ROTHs

### Warranty

12 months

### Socket Standard

Customized to destination country

## Applications

### Primary Applications

- Electric Motorcycle
- Scooter
- E-bike
