

# 16.8V 5A Li-ion Battery Charger for E-bikes

This battery charger is designed for 4S 16.8V Li-ion battery packs in E-bikes and scooters. It features CE certification and LED indicators.

## ADDITIONAL IMAGES

## Product Overview

### Professional Li-ion Battery Charging Solution

The S120 series is a high-performance 16.8V 5A battery charger engineered for 4S lithium-ion battery packs. Housed in a durable aluminium alloy shell, this unit provides a reliable charging solution for a wide range of electric vehicles and professional equipment. With CE certification, it meets essential safety and performance standards for international market applications.

## Technical Specifications

### Output Power

<b>84 W</b> Power Rating	<b>16.8 V</b> Voltage	<b>5 A</b> Current
-----------------------------	--------------------------	-----------------------

**Input Voltage Compatibility** 110-132VAC / 200-264VAC

**Battery Type** 4S Li-ion

## Physical Attributes

### Physical Specs

Dimension	Value
Length	137mm
Width	90mm
Height	51mm
Net Weight	0.8kg

## Compliance and Usage

### Compatible Applications

- Electric Bikes
- Electric Motorcycles
- Electric Scooters
- Cleaning Equipment
- Golf Carts

### Certifications

CE, RoHS

### Warranty

12 Months
