

16A 220V Single Phase Industrial Plug

This industrial plug is designed for single-phase 220V power connections and is rated at 16A. It is suitable for caravan and industrial applications.

Overview

Industrial Grade Power Connectivity

This 16A single-phase industrial plug is engineered for reliable power transmission in demanding environments. Featuring a robust IP44 splash-proof design, it provides secure connectivity for both industrial and caravan applications. The unit is fully compliant with international IEC and EN standards, ensuring safety and consistent performance for professional installations.

Electrical Specifications

Rated Current

16 A

Current

Voltage Range	220-250V
Poles Configuration	2P+E
Clock Position	6 h

Physical Characteristics

Protection Degree

IP44 • Splash Proof

Mounting Type	Portable
Product Color	Blue

Installation & Standards

Connection Type	Screw terminals
Compatible Wire Size	1-2.5 mm ² (flexible)
Compliance Standards	IEC 60309-1-2, EN 60309-1-2
