

# 16A 250V Single Pole Light Switch with Neon Indicator

This single pole light switch is rated for 16A at 250V AC and includes an integrated neon indicator. Constructed from flame-retardant thermoplastic, it is suitable for both residential and commercial applications.

## ADDITIONAL IMAGES

## Product Overview

### Professional Lighting Control

This 16AX 250V single-pole light switch is engineered for reliable performance in both residential and commercial lighting circuits. Featuring an integrated neon indicator, it ensures easy visibility in low-light conditions, enhancing user convenience. Built with durable, flame-retardant thermoplastic, this switch is designed for long-term safety and consistent operation.

## Technical Specifications

### Rated Current

**16 A**

Rated Current

Rated Voltage	250 V
Series Model	W50 Series (W50/L1/1/D)
Switch Configuration	Single Pole, Single Throw (SPST)
Indicator	Yes

## Compliance & Quality

Certifications	CB, CE, SASO
Warranty	10 years
Standard	British Standard

## Design & Build

### Material Features

- Flame-retardant thermoplastic
- Durable construction

### Color

White
