

16mm Feeder for SMT Placement Machines

This 16mm feeder is designed for use with SMT placement machines. It ensures accurate and reliable component delivery for surface mount assembly processes.

Product Overview

Precision SMT Component Feeder

This 16mm feeder unit is engineered for high-precision component delivery in automated surface mount technology (SMT) placement systems. Designed for consistent performance in high-volume production environments, it ensures reliable feeding accuracy to optimize assembly throughput. The unit features robust construction to withstand continuous operation and is a critical component for maintaining line efficiency.

Technical Specifications

Feeder Width	16 mm
Model Identifier	KT16C 026893

Compatibility & Range

Available Feeder Widths

- 8mm
- 12mm
- 16mm
- 24mm
- 32mm
- 44mm
- 56mm
- 72mm
- 88mm

Accessories & Parts

Available Components	Feeder Motor, Control Board, Power Cord, Trolley, Calibrator
