

16MP Infrared Trail Camera for Wildlife Observation

This infrared trail camera captures 16MP images and 1080P videos at 30FPS. Designed for wildlife observation, it uses infrared night vision with no flash to minimize disturbance.

Overview

High-Definition Wildlife Monitoring

This 16MP Infrared Trail Camera is designed for high-definition wildlife observation and outdoor surveillance. It captures crisp 1080P video at 30FPS with integrated sound, ensuring detailed documentation of animal activity. With a rapid 0.5-second trigger speed and support for high-capacity memory cards, it is a reliable tool for researchers and outdoor enthusiasts alike.
