

# 16V 14Ah Electric Scooter Gel Battery

This 16V 14Ah gel battery provides a reliable power source for electric scooters. Its design ensures durability, vibration resistance, and leak-proof operation.

## Overview

### High-Performance Gel Battery

The 16V 14Ah Electric Scooter Gel Battery is a high-performance power source engineered specifically for electric scooters. Utilizing advanced gel technology, this battery delivers consistent power, enhanced vibration resistance, and a reliable, leak-proof operation. Designed for durability and efficiency, it offers an excellent balance of capacity and weight, making it an ideal choice for demanding mobility applications.

Model Number	8-DZM-14
--------------	----------

## Technical Specifications

Voltage	16 V
Capacity	14 Ah
Specific Energy	35-38 Wh/kg
Recommended Charging	3-step charging

## Performance Metrics

### Cycle Life

**350 Cycles**

Standard Cycles

**650 Cycles**

With Maintenance

## Features

Key Features	Low self-discharge, High energy density, Leak-proof, Vibration resistant, Fast charging
Mounting Orientation	Any direction except inversion
