

16V Two-Speed Brushless Cordless Drill

This 16V cordless drill features a two-speed brushless motor. It is designed for drilling and fastening applications, providing increased power and runtime.

Overview

Professional Performance and Durability

This 16V two-speed cordless drill features an advanced brushless motor designed for extended maintenance-free operation and three times longer life compared to standard motors. Engineered for precision and comfort, it includes a soft-grip handle, variable torque settings, and integrated LED lighting for visibility in dark workspaces. The inclusion of ECP protection ensures battery longevity, making it a reliable tool for demanding drilling and fastening tasks.

Key Metrics

Performance Specifications

14.4 V

Rated Voltage

28 N/m

Max Torque

1400 r/min

Max No-Load Speed
