

16x5.5 Inch Tubeless Wheel Rim

This tubeless wheel rim measures 16x5.5 inches and is suitable for a variety of vehicles. It is constructed from high-quality materials, offering durability and a secure fit for tires.

Product Overview

Professional Trailer Wheel Rim

This 16x5.5 inch tubeless wheel rim is engineered for high-performance trailer applications, specifically catering to the requirements of the CIS market. It combines robust construction with a reliable design to support heavy load capacities of up to 1500kg. The silver-finished exterior provides professional aesthetics while the ventilation-focused geometry ensures thermal efficiency and weight optimization.

Technical Specifications

Rim Dimensions	16 x 5.5 inches
