

1.7 L 1800 W Electric Kettle

This electric kettle has a 1.7 L capacity and 1800 W power. It features a stainless steel body and an imported steam induction controller.

Overview

High-Performance Electric Kettle

This 1.7-liter electric kettle combines durability with modern efficiency, featuring a premium stainless steel body imported from Japan. Designed for safety and convenience, it includes an advanced British steam induction controller and multiple protection features such as auto power-off and dry-boil prevention. With its 360-degree rotating base and hidden cord storage, it offers a seamless and clutter-free experience for any professional or home kitchen environment.
