Overview

High-Capacity Water Distribution Solution

This 17000L water distribution truck is engineered for heavy-duty performance in road maintenance, construction site dust suppression, and large-scale irrigation. Built on an 8x4 drive chassis, it combines a massive tank capacity with a robust 380hp engine to ensure reliable operation across demanding terrains. The vehicle is fully equipped with advanced sprinkler systems, including front and rear sprayers and a water cannon, making it a versatile asset for professional water management.

Vehicle Dimensions & Weight

Chassis Dimensions (LxWxH)	10300x2540x3300mm
Curb Weight	13000 kg
Gross Vehicle Weight (GVW)	31000 kg

Engine & Performance

Engine Performance

380 ps

Horsepower

9839 ml

Displacement

6 In-line

Cylinders

Transmission	8 Speed Manual (8 Forward, 2 Reverse)
--------------	---------------------------------------

Chassis & Drivetrain

Drive Type	8x4
Wheelbase	1850+3280+1370mm
Tire Configuration	13 (including spare), 12R22.5 16PR

Tanker Specifications

Tank Capacity	17000 L
Tank Material	Carbon Steel
Tank Thickness	5mm (6mm seal head)

Equipment & Features

Sprinkler System Equipment

- Front dash spray
- Rear & side sprinkler
- Water cannon
- Gravity valve
- Fire interface
- Working platform

Standard Features

Power Steering, Air Conditioning, Tubeless Tires, ABS, Maintenance-Free Battery, Central Lock, Power Windows, Driving Data Recorder
