

170W Polycrystalline Solar Module

This 170W polycrystalline solar module is designed for various applications. It features durable construction and excellent performance in low-light conditions.

Product Overview

High-Efficiency 170W Polycrystalline Solar Module

This 170W polycrystalline solar module is engineered for reliable and sustainable energy generation across diverse environments. Designed with durable construction, it delivers excellent performance even in low-light conditions, making it an ideal choice for residential, commercial, and off-grid solar power systems. Its robust build ensures consistent power output and long-term value for various solar applications.

Technical Specifications

Rated Power

170 W

Logistics and Trade

Packaging and Shipping Details

Item	Details
Standard Payment	30% T/T in advance, balance before dispatch
L/C Requirement	Irrevocable L/C at sight (if amount > \$50,000)
West Union	Accepted for amounts < \$2,000
Production Lead Time	10 to 15 days
Delivery Time	7 to 10 working days after advanced payment
Accepted Payment Terms	T/T, FOB, CIF, CFR, L/C, West Union
