

# 173CC 5.0HP OHV Engine

This 173CC 5.0HP engine is designed for use in gardening tools and similar equipment. The OHV configuration enhances efficiency and performance.

## Product Overview

### High-Performance 5.0HP OHV Engine

This 173CC overhead valve (OHV) engine is engineered to provide reliable power for outdoor equipment. Its robust design features a protective metal cage and efficient four-stroke operation, making it an ideal choice for machinery such as lawnmowers and tillers. Designed for durability and performance, this unit ensures consistent output for demanding landscaping tasks.

## Technical Specifications

### Displacement

**173 CC**

Displacement

### Power Output

**5 HP**

Rated Power

### Valve Configuration

OHV (Overhead Valve)

### Engine Type

4-Stroke

## Design Features

### Key Features

- Protective metal cage
- Gray and orange engine cover
- Integrated exhaust system
- OHV configuration for efficiency

### Common Applications

Lawnmowers, Tillers, Outdoor Power Equipment
