

17kW Generator Engine

This 17kW generator engine is a robust and efficient power source designed for various applications. It is engineered for power generation, providing a stable and consistent output.

Overview

High-Performance Generator Engine

This 17kW diesel engine is engineered specifically for 15kVA generator sets, operating efficiently at 1500rpm. Based on a proven British Ricardo design, this unit prioritizes high reliability and low fuel consumption for demanding applications. Its robust, heavy-duty construction ensures longevity, while the user-friendly design facilitates straightforward maintenance to minimize operational downtime.

Technical Specifications

Rated Power

17 kW

Rated Power Output

15 kVA

Generator Set Capacity

Operating Speed

1500 rpm

Fuel Type

Diesel

Key Features

Engine Highlights

Heavy Duty, British Ricardo Design, Low Fuel Consumption, Easy Maintenance, High Reliability
