

1.7L Electric Kettle with Purple Accents

This electric kettle is designed for efficient and rapid boiling of water. It features a clear water level window and an ergonomic handle for comfortable pouring.

Overview

Efficient Boiling Performance

This 1.7L electric kettle combines practical design with reliable performance, featuring a durable plastic housing and a concealed heating element for efficient water boiling. Designed for safety and convenience, it includes a boil-dry protection system, a safety locking lid, and a 360-degree rotational base for easy handling. The integrated water level window allows for precise filling, while the stylish purple accents add a modern aesthetic to any kitchen or office environment.
