

1.7L Electric Kettle with Transparent Water Level Gauge

This electric kettle boils water quickly with its 1850-2200W power. It features a heat-resistant plastic housing and a transparent double water level gauge for easy monitoring.

Overview

Efficient Boiling Performance

This 1.7L electric kettle is designed for rapid and efficient water heating, featuring a powerful 1850-2200W stainless steel heating element. The unit is constructed with a heat-resistant, easy-care plastic housing and includes a double transparent water level gauge for precise filling. Equipped with essential safety features like automatic switch-off and overheating protection, it is a reliable choice for professional environments.
