

1.7L Stainless Steel Electric Kettle

This electric kettle has a 1.7L capacity and a split-type base for 360-degree rotation. It features automatic overheat disconnect protection and a heating lamp.

Product Overview

Efficient Stainless Steel Kettle

This 1.7L stainless steel electric kettle is designed for both home and office environments, offering rapid boiling capabilities with a powerful 1500W heating element. It features a convenient split-type base with 360-degree rotation for easy handling and pouring. Safety is prioritized with automatic overheat protection and an auto-shutoff function once the water reaches the boiling point.

Technical Specifications

Capacity	1.7 L
Power Output	1500 W
Voltage/Frequency	220V-240V / 50Hz

Design & Build

Body Material	Stainless Steel
Base Features	Split type base, 360 degree rotation

Safety & Operation

Safety Protections

- Automatic overheat disconnect protection
- Automatic shut-off when boiling

Heating Indicator	Yes
