

# 1.7L Stainless Steel Electric Kettle

This electric kettle efficiently boils water with a 1500W power rating. It features a stainless steel body, a detachable base with a 360-degree swivel, and a water level indicator.

## Overview

### Efficient Stainless Steel Boiling

This 1.7L electric kettle combines durable stainless steel construction with a sleek, user-friendly design perfect for professional or home environments. Featuring a concealed heating element and a 1500W power rating, it ensures rapid and safe boiling every time. The 360-degree swivel base and convenient water level indicator make it a practical, high-performance solution for daily hot water needs.

## Technical Specifications

Capacity	1.7 L
Power Rating	1500 W
Voltage	220-240V
Frequency	50/60Hz
