Overview

Versatile Material Handling Solution

The FBD18/20 Electric Stand-On Stacker is an advanced material handling solution designed for efficient loading, unloading, and stacking of palletized goods. Featuring a robust AC control system and high-stability 'H' steel channel mast, it offers reliable performance with low maintenance costs. This versatile equipment is ideal for demanding environments including warehouses, workshops, and specialized industrial sectors like chemical and pharmaceutical processing.

Performance Highlights

Key Performance Metrics

1.8 T

Minimum Capacity

2 T

Maximum Capacity

Technical Design

Control System	Latest AC control system for precise operation
Mast Construction	"H" steel channel for enhanced stability and service life

Operational Features

Operator Position

Stand-on Platform

Maneuverability & Visibility

- Stand-on design for enhanced visibility
- Intuitive controls for precise operation
- Compact footprint for tight warehouse aisles
- Adjustable forks for various pallet sizes

Applications

Operating Environments

- Warehouses and Supermarkets
- Workshops and Factories
- Freight yards and Railways
- Port and Container loading
- Areas with explosive mixtures

Suitable Industries

Petroleum, Chemical, Pharmaceutical, Textile, Military, Warehousing, Logistics, Agriculture

Sustainability

Power Source

Electric motor for emission-free operation
