

18 AWG Multi-Conductor Rubber Cable

This multi-conductor rubber cable is 18 AWG and suitable for internal wiring in appliances and electronic equipment. Its rubber jacket offers flexibility along with resistance to abrasion, moisture, and chemicals.

Product Overview

Versatile Multi-Conductor Rubber Cable

This high-performance rubber-insulated cable is designed for demanding environments requiring durability and flexibility. Available in multiple configurations, it provides reliable power distribution for industrial and household appliances. Its construction offers superior resistance to abrasion, moisture, and chemical exposure, ensuring long-term performance in various operational conditions.

Technical Specifications

Voltage Ratings

300V • 600V

Conductor Configuration

- 2 * 18 AWG
- 6 * 12 AWG

Certifications

UL Certified, VW-1

Temperature Rating

105 °C

Available Series Models

SJ, SJO, SJOW, SJOOW, S, SO, SOW, SOOW, SV

Application

Typical Applications

- Household electrical appliances
- Water pumps
- Lighting systems
- Power tools
- General power cords
