Overview

High-Performance Gasoline Engine

This robust 18 HP gasoline engine is engineered for demanding industrial and power generation applications. Delivering a consistent 10.5kW of power at 3600rpm, it provides the reliability needed for heavy-duty equipment like generators and water pumps. With dual recoil and electric start options, this unit ensures versatile and user-friendly operation in various environments.

Performance

Power Output

18 HP

Horsepower

10.5 kW

Power Output

Rated Speed

3600 rpm

Technical Specifications

Engine Displacement

460 cc

Starting System

Recoil Start, Electric Start

Applications

Ideal Applications

- Power Generators
- Water Pumps
- Heavy-duty Industrial Equipment
