

18-Inch High-Speed Steel General Purpose Drill Bit

This high-speed steel drill bit is designed for general-purpose drilling applications. Its 18-inch length allows for deep hole drilling in wood, plastic, and soft metals.

Product Overview

General Purpose Deep Hole Drilling

This 18-inch drill bit is engineered for deep hole drilling applications across a variety of materials. Constructed from high-speed steel, it offers durability and performance for professional use. The standard flute design ensures efficient chip removal, while the round shank provides broad compatibility with standard drill chucks.
