Product Overview

Professional Air Circulation

This 18-inch high velocity tripod fan is engineered for industrial, commercial, and residential use, offering rapid cooling and high-volume air circulation. Featuring a robust motor and durable aluminum blades, it provides consistent performance in demanding environments like workshops, garages, and large spaces. The adjustable tripod base ensures maximum stability, while the versatile tilt head allows for precise control over airflow direction.

Technical Specifications

Performance Metrics

125 W

Power Consumption

7 m/s

Air Speed

2678 CFM

Airflow

Electrical Requirements

Parameter	Value
Voltage	120V
Frequency	60Hz
Cord Length	1.6m

Features and Design

Key Features

- 3-speed rotary switch control
- Adjustable tripod height
- Adjustable tilt fan head
- Oscillation functionality
- Durable aluminum blades

Environment Suitability

Industrial, Commercial, Residential, High Velocity

Logistics and Physical Data

Shipping and Weight

Detail	Value
Net Weight	6.76 kg
40' HC Loading Qty	Per standard container capacity
Packaging	Individual color box
