

18-Inch Professional Audio Woofer

This high-performance 18-inch woofer is designed for professional audio applications. It features a robust construction for durability and delivers a deep, powerful bass response.

Product Overview

High-Performance 18-Inch Woofer

This professional-grade 18-inch woofer is engineered for demanding audio applications, delivering deep and powerful bass response. Designed for reliability and durability, it features robust construction suitable for subwoofers and low-frequency loudspeaker systems. The combination of high-quality materials ensures optimal stiffness, damping, and long-term performance in professional environments.

Physical Specifications

Nominal Diameter	18 inch
Cone Material	Treated paper
Surround Material	Treated cloth

Technical Components

Voice Coil Material	Copper wire
Magnet Material	Ferrite

Key Features

Durability Highlights

High-temperature former • Robust construction • Long-term reliability

Best For	Subwoofers, Low-frequency systems, Professional audio
