

18-Speed Mountain Bicycle with High-Carbon Steel Frame

This mountain bicycle features a shaped high-carbon steel frame for ruggedness. The Shimano transmission system provides smooth 18-speed gear changes.

Overview

Performance and Durability

This 26-inch mountain bicycle is engineered for both off-road adventures and recreational riding. Built with a high-carbon steel frame, it offers exceptional durability and stability across various terrains. The inclusion of a suspension fork and an 18-speed drivetrain ensures a comfortable ride and efficient gear management for different inclines.

Technical Specifications

Wheel Size	26 inch
