Overview

High-Capacity Underground Loader

The WJ-7 is an 18-metric-ton diesel-powered underground wheel loader engineered for high-efficiency material handling in demanding tunnel environments. Featuring a 7m³ bucket capacity and advanced engine and hydraulic systems, this machine offers exceptional maneuverability and robust performance in spaces 4m x 4m or larger. Designed for reliability and productivity, it incorporates premium components to ensure minimal downtime and high operational availability.

Performance Metrics

Key Performance Metrics

18 Metric Ton

Loading Capacity

7 m³

Bucket Volume

350 kN

Max Shovel Force

Technical Specifications

Powertrain

Component	Details
Engine Model	VOLVO PENTA TAD1352VE
Rated Power	315 kW @ 1900 rpm
Transmission	Dana Spicer TE32 Electric
Drive Axle	KESSLER D111

Dimensions

- Length: 11,060 mm
- Width: 3,000 mm
- Height: 2,745 mm
- Dumping Height: 2,445 mm

Compliance & Features

Optional Upgrades

Sealed Cabin (AC/Heater) • Automatic Central Lubrication • Fire Suppression System • Remote Control • Travel Aid System

Certifications

CE, QS9001, CA
