

180 Degree Long Radius Elbow

This is a 180-degree elbow made from 1.4539 904L stainless steel with a seamless construction. It offers good corrosion resistance and conforms to ASME B16.9 and ASTM A403 standards.

Product Overview

High-Performance 180 Degree Long Radius Elbow

This 180-degree long radius elbow is engineered for demanding industrial piping systems requiring superior corrosion resistance. Manufactured from high-grade 1.4539 (904L) stainless steel, it ensures durability in aggressive environments. The seamless construction and adherence to international standards like ASME B16.9 and ASTM A403 make it a reliable choice for critical fluid transport applications.

Technical Specifications

Manufacturing Process

Seamless

Example Dimensions

60.3 mm

Outer Diameter

5.54 mm

Wall Thickness

Material Grade	1.4539 (904L) Stainless Steel
Size Range	1/23 - 48DN12 - DN1200
Radius Type	1.5D Long Radius

Compliance & Standards

Compliance Standards	ASME B16.9, ASTM A403, GB/T12459, GB/T13401, SH3408, HG/T21635
