

1800W Die Cutting Laser Machine

This die cutting laser machine is designed for industrial applications requiring precision. It features a powerful 1800W laser for efficient cutting of various materials.

Product Overview

Industrial Die Cutting Excellence

The YM1218 laser machine is engineered for high-precision industrial die cutting applications, offering exceptional stability and accuracy. Featuring a powerful 1800W laser source, this unit is capable of efficiently processing a wide range of materials with intricate designs and tight tolerances. Its robust construction and large working area make it an ideal choice for professional environments requiring repeatable, high-quality results.

Technical Specifications

Model Identifier	YM-1218
------------------	---------

Key Features

Primary Capabilities	High-Precision, Industrial Grade, Intricate Design Cutting, Repeatable Accuracy
----------------------	---------------------------------------------------------------------------------

Safety and Operation

Operational Controls

- Intuitive control panel for operation
- Real-time process monitoring
- Integrated safety shielding
- Operator protection systems
