Product Overview

Professional 1800W Hot Air Gun

This versatile 1800W hot air gun is engineered for a wide range of professional applications, including paint removal, loosening rusted bolts, thawing frozen pipes, and precise heat shrinking. Featuring adjustable temperature settings and dual airflow modes, it provides the control needed to prevent material damage while ensuring efficient performance. Designed with ergonomics and safety in mind, it includes overheat protection and a built-in stand for stable, hands-free operation.

Performance Metrics

Operational Modes

Mode	Temperature Range	Air Flow
I	60-400°C	300 L/min
II	60-600°C	500 L/min

Input Power	1800 W
Voltage/Frequency	220-230V / 50Hz

Key Features

Safety & Design

Overheat Protection • Adjustable Temperature • Ergonomic Design • Built-in Stand

Applications	Paint Removal, Heat Shrinking, Pipe Thawing, Loosening Bolts
