

180L Two-Door Compact Refrigerator

This compact refrigerator utilizes direct cooling methods. It features a two-door design, with a 107L freezer capacity and a total effective volume of 180L.

Overview

Compact Cooling Solution

The 180L Two-Door Compact Refrigerator offers an efficient and space-saving design suitable for various professional and residential environments. Featuring a dual-compartment layout with a 107L refrigerator section and a 73L freezer, it provides flexible storage options for diverse needs. The unit utilizes R600a refrigerant and advanced cyclopentane blowing agents, ensuring reliable performance while maintaining a standard power consumption of 0.43 kW-h/24h.

Capacity & Performance

Key Performance Metrics

180 L

Total Volume

5 kg/24h

Freezing Capacity

0.43 kW-h/24h

Daily Power Consumption

Compartment Breakdown

Compartment	Volume
Refrigerator	107
Freezer	73

Electrical Specifications

Power Requirements

- Voltage: 220V
- Frequency: 50Hz
- Input Power: 60W
- Rated Current: 0.7A
- Min. Starting Voltage: 165V

Technical Details

Electric Shock Protection

Type I

Climate Compatibility	SN, N, ST
Cooling Technology	Direct Cooling
Refrigerant	R600a

Dimensions

Product Dimensions	534 x 575 x 1465 mm
Packing Dimensions	570 x 655 x 1530 mm
