

180mm Continuous Rim Diamond Saw Blade for Ceramic Tile Cutting

This diamond saw blade is used for cutting glazed, rustic, and polished crystal tile. It features high sharpness, flat cutting slots, no chipping, and delivers long-lasting performance, making it suitable for cutting various types of ceramic.

Product Overview

Precision Ceramic Cutting Solution

This 180mm continuous rim diamond saw blade is engineered for high-performance cutting of various ceramic materials, including glazed, rustic, and polished crystal tiles. It delivers exceptional sharpness and smooth, chip-free cutting slots for a professional finish. Designed for durability, it ensures long-lasting performance on both manual and automatic cutting machines.

Technical Specifications

Cutting Type

Wet Cutting • Continuous Rim

Blade Diameter	180 mm
Bore Diameter	60 mm
Blade Thickness	2 mm
Rim Height	10 mm

Compatibility & Usage

Compatible Machines

- Manual Cutting Machines
- Automatic Cutting Machines (Single-head)
- Automatic Cutting Machines (Multi-head)

Compatible Materials

Glazed Tile, Rustic Tile, Polished Crystal Tile, Porcelain Tile, Vitrified Tile, Floor Tile, Wall Tile
