

180mm Surface Polisher

This 180mm polisher is a versatile tool for polishing surfaces. It features variable speed control and an ergonomic design for comfortable handling.

Overview

Professional Surface Polisher

This 180mm surface polisher is engineered for high-performance finishing tasks across automotive, woodworking, and metalworking industries. It features a robust motor designed for consistent, reliable operation under load, paired with variable speed control to ensure precision across different materials. The ergonomic design prioritizes user comfort, making it suitable for extended professional use while delivering high-quality, consistent results.

Technical Specifications

Polishing Pad Diameter	180 mm
Speed Control	Variable speed control

Features

Included Accessories

- Polishing pad

Design Highlights

Ergonomic Design • Robust Motor

Suitable Applications

Automotive Detailing, Woodworking, Metal Polishing
