

18A Automotive Blade Fuse

This automotive blade fuse has a current rating of 18A. It features silver-plated blade terminals for a reliable electrical connection.

Product Overview

Reliable Circuit Protection

This 18A automotive blade fuse is engineered for dependable circuit protection in various vehicle electrical systems. It features a robust black plastic housing with corrugated edges, ensuring a secure grip and easy handling during installation or replacement. The integrated clear viewing window allows for rapid visual inspection of the fuse element, minimizing downtime during maintenance.
