

1.8kW Portable Digital Inverter Generator

This silent inverter generator delivers a rated power of 1.8kW and a maximum power of 2.0kW. It features a 79.7CC engine, recoil start, and automatic voltage regulation.

Overview

Portable Digital Inverter Generator

This 1.8kW digital inverter generator provides a reliable and efficient power solution for professional and portable applications. Engineered for versatility, it features a comprehensive digital display for monitoring voltage, frequency, and operating time, ensuring precise power management. With built-in safety features like oil alerts and overload protection, combined with energy-saving modes, this unit is designed for consistent performance and ease of use in diverse environments.
