

1.8L Electric Drip Coffee Maker with Programmable Timer

This electric drip coffee maker features a 1.8L glass carafe and a 1000-watt heating element. It includes a programmable timer, digital controls, and a keep-warm function.

Overview

High-Capacity Programmable Brewing

This 1.8L electric drip coffee maker is designed for high-volume environments, featuring a 14-cup glass carafe and a powerful 1000-watt heating element. The modern aesthetic combines durable plastic housing with a sleek stainless steel wrap, making it suitable for both professional and domestic settings. With its integrated programmable timer and digital LED display, users can easily schedule brewing to ensure fresh coffee is ready exactly when needed.
