Overview

Portable Cooling Solution

This 18L portable refrigerator and freezer is engineered for reliable cooling in mobile environments, including cars, trucks, and RVs. It features a robust compressor-based cooling system capable of operating on both AC and DC power sources. With an intuitive digital control interface and integrated USB charging capabilities, it provides both convenience and performance for travelers and outdoor enthusiasts.

Technical Specifications

Capacity	18 L
Power Input	DC 12V, DC 24V, AC
Fuse Rating	15 A

Features

Integrated Ports

- USB charging port

Control Panel Features

Digital Display • Temperature Adjustment • Voltage Monitoring • Battery Level Indicator • Run Status Indicator

Cooling Technology	Compressor
