Product Overview

High-Performance Cordless Heat Gun

The 18V Cordless Heat Gun offers professional-grade portability for a variety of tasks including heat shrinking, paint stripping, and loosening rusted components. Engineered with innovative cellular heating technology, it achieves operational temperatures in just 5 seconds. The tool features a robust safety design, including double overheat protection and a specialized cooling cycle to ensure longevity and reliable performance in demanding work environments.

Key Features

Core Functionality

- Cordless operation for maximum portability
- Innovative cellular heating technology
- Dual-action trigger for precise control
- Integrated LED work light
- Foldable hanging hook for convenient storage

Technical Specifications

Heat-up Time

5 s

Time to Operational Temp

Auto-Cooling Duration

5 s

Power System

18V Lithium-ion Battery
