Product Overview

Precision-engineered 18x7-8 non-marking solid tire designed for high-load industrial applications.

Durable solid construction ensures long service life and resistance to punctures.

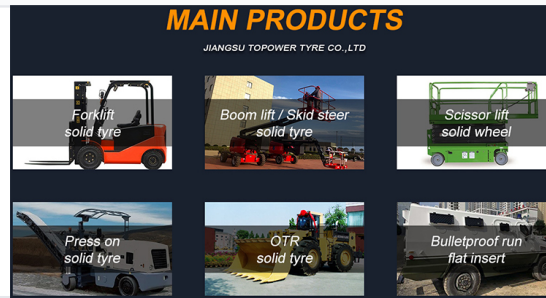

High-tech adhesive bonding ensures the rubber remains firmly fitted to the steel ring.

High-Performance Non-Marking Solution

These 18x7-8 non-marking solid tires are engineered for environments where floor cleanliness is a priority, such as pharmaceutical facilities, catering services, and textile manufacturing. Constructed with high-quality natural rubber and advanced adhesives, they ensure a firm fit between the rubber and steel ring for superior durability. These tires are designed to leave no marks on the ground during operation or braking, providing a clean and professional workspace while maintaining excellent traction.

Tire Size	18x7-8
Key Features	Non-Marking, Natural Rubber, High-Tech Adhesive Bond, Resilient Construction

Applications

Our range of industrial solid tires covers various equipment types including forklifts, boom lifts, and scissor lifts.

Suitable Industries

- Pharmaceuticals
- Catering Trade
- Textile Manufacturing
- Warehousing
- Indoor Logistics

Compatible Equipment

Forklifts • Boom Lifts • Skid Steers • Scissor Lifts • Industrial Presses
